CABEI, committed to building a sustainable future

In an increasingly interconnected world, we must address the impact of our actions on the environment, human rights, and economic stability.

For the Bank’s global projects, such as climate change, biodiversity loss and pollution, it is clear that we must incorporate environmental and social criteria into our projects from the outset, to avoid negative impacts on the population and the environment.

CABEI employs a comprehensive system of policies and guidelines to support the implementation of sustainable practices. These policies are designed to ensure that all projects are assessed for their environmental and social impact, and that measures are taken to mitigate any potential negative effects.

In this regard, the Bank’s Environmental and Social Strategy 2020-2024 (SASC) is a guide that reflects the Bank’s commitment to sustainability and the protection of the environment. The SASC is designed to provide a framework for the integration of environmental and social considerations into all aspects of the Bank’s operations.

CABEI’s commitment to sustainability is demonstrated through its alignment with the United Nations Sustainable Development Goals (SDGs), which provide a global framework for action to achieve a sustainable future.

CABEI’s projects are designed to stimulate development and contribute to the region’s economic and social progress, while also taking into account their potential environmental impact. The Bank’s projects are designed to promote environmental sustainability, community development, and social inclusion, while also addressing the region’s economic needs.

CABEI’s projects are designed to achieve a balance between economic development and environmental sustainability, with a focus on promoting sustainable practices and minimizing negative impacts on the environment.

CABEI’s internal environmental and social responsibility activities

CABEI’s environmental and social responsibility activities are a fundamental aspect of the Bank’s operations, and are designed to ensure that projects are developed in a sustainable manner. These activities include:

- Evaluation of energy consumption
- Management of water and waste for all projects
- Reducing water consumption
- Shale gas exploration
- Relativization of salaries with the subsidies of the region
- Reduction of drinking water consumption

Thematic maps

CABEI’s environmental and social responsibility activities are designed to enable a competitive and sustainable economic development, with a focus on social inclusion, development of the region and innovation.

In this way, it is possible to achieve a balance between economic development and environmental sustainability, with a focus on promoting sustainable practices and minimizing negative impacts on the environment.

CABEI’s commitment is to provide support to all countries, regardless of their level of development, to achieve a sustainable future. The Bank’s projects are designed to promote environmental sustainability, community development, and social inclusion, while also addressing the region’s economic needs.

CABEI’s projects are designed to achieve a balance between economic development and environmental sustainability, with a focus on promoting sustainable practices and minimizing negative impacts on the environment.
