The Central American Bank for Economic Integration -CABEI- as a multilateral development institution committed to economic, social and environmental sustainability, establishes the following Environmental Management System statement, which is aligned with the principles established in the Institutional Environmental and Social Policy.

CABEI, in relation to the management of the facilities in accordance with the Environmental Management System’s Scope, is committed to:

- Adopt the provisions contained in policies, regulations and other requirements applicable to the environmental aspects identified in the Environmental Management System.

- Manage, through prevention activities, the environmental impacts of its administrative and operational activities by implementing the corresponding operational controls, measurements, and monitoring.

- Adopt best practices for environmental protection in daily operations, including:
  - Saving and sustainable use of resources.
  - Reduction and segregation of waste.
  - Definition and application of criteria to promote the acquisition of environmentally friendly goods and services.
  - Climate change mitigation and adaptation activities.

- Continuously improve the Bank’s environmental performance with reliable and timely information, establishing environmental objectives and action plans for their achievement, supported by employee training and environmental awareness.

CABEI, through the Corporate Environmental and Social Responsibility System (SASC), periodically informs its stakeholders about its environmental management.

Approved on September 22, 2021 through Agreement No. SASC 044/2021.
